

NATIONAL JUNIOR ANGUS SHOW

Phenotype & Genotype Show

THURSDAY, JULY 3, 2025 • JUDGE: RYAN RATHMANN

2025

ABOUT THE SHOW

The objective behind the Phenotype and Genotype Show (PGS) is to create another avenue for juniors to show their animals in an additional competition while providing an educational opportunity to learn about the value of expected progeny differences (EPDs) as part of the process in selecting seedstock. Animals entered in the PGS will be evaluated by a judge under a system that requires both genotypes and phenotypes to be considered. The results will be a composite score where the genotype EPD placing and phenotype placings will be equally weighted at fifty percent. All animals must have been genomic tested with results prior to the show.

PLACING PROCEDURES

After check-in, classes will be broke based on a logical age break, not necessarily following formal American Angus Association Classifications. The PGS Judge will receive judge's cards by class that include entry number, birthdate, and EPDs along with a percentile chart. He or show will place the class based on his/her preferences. Genotype results will be turned into the Association staff to compile prior to the show.

The show will be run similar to other NJAA sponsored shows where the judge will evaluate the class in the same manner. The same judge that evaluated the EPDs will evaluate the cattle based on phenotype. The judge will receive a judge's card with birthdates only for phenotype classes. The phenotype placings will be recorded and compiled with the genotype placings.

The composite score will be made up of fifty percent genotype placing and fifty percent phenotype placing. In the event of a tie, the tie will be broke based on the phenotype placings. The judge will be broke based on the phenotype placings. The judge will then receive a judge's card with the composite placing and respective EPDs to talk the class. During divisions and the grand drive, the judge will receive judge's cards.
